**Template Tip:** Use the [Project Plan](#)<sup>1</sup> Confluence page template and wrap the table at the beginning with a [Page properties / Content properties](#)<sup>2</sup> macro. This allows you to access the table's data within your Scroll Exporter PDF template.

**The cover page of this template is using the Driver and the Status.**

**Template Tip:** *Want the next part of your content to start in a new page?* Using [Scroll Exporter Extensions](#)<sup>3</sup> you get access to very handy macros such as [scroll-page-break](#)<sup>4</sup> which enables you to add page breaks in your exports within your Confluence content.

## Problem Statement

WiseApp currently lacks a unified and strategic approach to metrics tracking, limiting its ability to make informed, data-backed decisions. This project aims to embed comprehensive tracking capabilities across the platform, empowering the team with insights into user behavior, app performance, and engagement. By closing the gap between data collection and action, the project will help drive continuous improvement and long-term strategic growth.

## Scope

<b>Must have:</b>	<ul style="list-style-type: none"><li>• Defining key metrics aligned with WiseApp's objectives.</li><li>• Integrating selected tracking tools into WiseApp's infrastructure.</li><li>• Setting up systems for data collection and ensuring data accuracy.</li></ul>
<b>Nice to have:</b>	<ul style="list-style-type: none"><li>• Developing dashboards for data visualization and analysis.</li><li>• Implementing iterative improvements based on insights gained.</li></ul>
<b>Not in scope:</b>
