Administrators Guide

This is the Administrators Guide. It provides information about the following:

- Cleaning Temporary Files
- Configuring the Connection Settings
- Creating a Link on a Page to Export the Content
- Creating an Export using the REST API
- Disabling Default Export Schemes
- Disabling Templates
- Enabling only one Exporter for Certain Spaces
- Using Scroll Exporter and the Confluence Exporter Side by Side
- Tuning Export Performance
- Restrict the export functionality in spaces and for user groups
