Scroll Versions 2.8 Release Notes

March 2014

We are proud to announce Scroll Versions 2.8. This release is focused on health checks and on minor improvements and bug fixes.

Note

Scroll Versions 2.8 is the last version of Scroll Versions supporting Confluence 5.2 and before. All following versions will only be supporting Confluence 5.3 and later.

⚠️ If you are upgrading from Scroll Versions 2.7.2, please follow the Scroll Versions 2.7.3 Update Instructions.

Highlights in Scroll Versions 2.8

- Self-service your Scroll managed spaces with the new Scroll Health Checks
- Multiple improvements and bug fixes

In Detail

1

Self-service your Scroll managed spaces with the new Scroll Health Checks

With Scroll Versions 2.8 we introduced the Scroll Health Checks, Space Administrators are now able to perform several checks on Scroll related data.
Those checks help to **self-service and troubleshoot the spaces** managed with Scroll Content Management and provide better reports to the K15t Support team.

**2**

**Multiple improvements and bug fixes**

In Scroll Versions 2.8 we implemented multiple smaller improvements and bug fixes, including:

- Always display orange border in inline dialogs in Confluence 5.7: [VSN-2044 - Getting issue details...](#)
- Fixed issue with missing comments on removed changes: VSN-2006 - Getting issue details...
- Fixed issue with unresolved UI placeholders: VSN-2029 - Getting issue details...
- Fixed issue with Includeplus macro: VSN-2043 - Getting issue details...
