Scroll Versions 2.1 Release Notes

1 October 2013

We are proud to announce Scroll Versions 2.1.

Highlights in Scroll Versions 2.1

- Compatibility with Scroll Translations
- Performance Improvements during Publishing
- Multiple Bugfixes

Info

If you are upgrading from Scroll Versions 2.0.x, please have a look at the Scroll Versions 2.1 Update Instructions.

In Detail

1

Compatibility with Scroll Translations

Scroll Versions 2.1 is fully compatible with Scroll Translations, our new plugin to manage multiple languages in Atlassian Confluence. Using both of the add-ons you are able to manage multiple languages, variants and versions in a single space.

2

Performance Improvements during Publishing

We have improved the publishing a lot. Depending on how many pages have changed, the publishing is up to 10 times faster.
Multiple Bugfixes

Besides we've fixed various bugs:

- Unable to locate Jira server for this macro. It may be due to Application Link configuration.

- Unable to locate Jira server for this macro. It may be due to Application Link configuration.

- Unable to locate Jira server for this macro. It may be due to Application Link configuration.

- Unable to locate Jira server for this macro. It may be due to Application Link configuration.

- Unable to locate Jira server for this macro. It may be due to Application Link configuration.

- Unable to locate Jira server for this macro. It may be due to Application Link configuration.
